

METARADAR STAKEHOLDER CALIBRATION LEARNING LOOP

Mechanism 5: Human-in-the-Loop Feedback Adapts Relevance, Routing, and Action Logic

CLOSED-LOOP FEEDBACK MECHANISM

BEFORE VS AFTER STAKEHOLDER CALIBRATION

ILLUSTRATIVE EXAMPLE

INCOMING SIGNAL: Competitor Phase III Trial Update (Hemgenix 3-Year Durability Readout)

BEFORE STAKEHOLDER INPUT (AI Baseline)

Priority Assessment:

High Competitor Relevance (Generic)

Function Routing:

Unfiltered Broadcast to All Functions

Suggested Internal Action:

"Review clinical publication data"

AFTER STAKEHOLDER INPUT (Calibrated Output)

Targeted Priority & Relevance:

Targeted Focus (Medical Affairs & Regulatory)

Function Routing:

Primary: Medical Affairs | Secondary: Regulatory

Function-Specific Action:

"Medical Affairs: prepare an internal evidence review; monitor upcoming congress data; avoid unsupported comparisons."
